

Tango5 Workshop

By Don Wilson

Prerequisites:

- Have Tango5 loaded and running on your laptop (or desktop at home).
- Bring your laptop to the workshop.
- We will have some technicians for attendees if you need one-on-one assistance.

The workshop will be designed not only to show you how to get the most use out of Tango5 files, but will focus on “How to Make Money” and “How to Manage Your Money”.

How to use the Special Features:

1. We will answer any questions or solve any problems you have with Tango5.
2. Changing the “Master” family in the batch file.
3. How to Select Custom Look Back and Setting Custom Look Back periods.
4. Risk Level, how to choose the ranking risk level.
5. Fund Selection, how I and others select funds from the ranking.
6. Discussion on the Tango5 “sell” criteria (when to sell).
7. Setting up and using Sector Analysis with Tango5.
8. Setting up and using Tango5 ranking for ETF’s, Profunds, Rydex, or any Special Investment Group.
9. Setting up and using the 401k feature in Tango5.
10. Money Management using files from www.donsfunds.com.

For Money Managers or Advisors we will have a discussion outside the workshop on how you can use Tango5 for your clients. This will probably be immediately after the main workshop.
